

GSCTX COVID-19 Vaccination FAQs

- Updated 1 May 2021

- 1. Once adults are permitted to receive the COVID-19 vaccination in their home state, are volunteers required to be vaccinated before they can meet in person with girls?**
Girl Scouts of the USA (GSUSA) strongly encourages, but does not require, vaccination for volunteers. State laws and council policies vary. The state of Texas does not have a COVID-19 vaccine mandate.
- 2. Can council staff members inquire about the vaccination status of volunteers?**
Deciding to receive a vaccine is a personal decision, and GSCTX encourages our staff and members to respect the privacy of fellow members and their families.
- 3. Can parents/caregivers ask about the vaccination status of volunteers?**
Volunteers are under no obligation to disclose their personal vaccination status. Also, under no circumstances should a volunteer discuss the personal healthcare decisions of another volunteer with anyone.
- 4. Can parents/caregivers or volunteers ask about the vaccination status of council staff and camp staff?**
While parents/caregivers may certainly ask and GSCTX strongly encourages all council staff members who can get vaccinated to become vaccinated when the vaccine is available to them, council staff are under no obligation to disclose their personal vaccination status. Under no circumstances should one staff member discuss the personal healthcare decisions of another staff member with anyone.
- 5. Can parents/caregivers ask other parents/caregivers about the vaccination status of girls in the troop?**
Parents/caregivers should not feel obligated to share personal medical information if they choose to maintain their privacy in the matter. GSCTX encourages parents/caregivers to respect the privacy of the girls and other adults in their girl's troop.
- 6. Once vaccinations for children are available, can councils or troop leaders require girls to be vaccinated before they attend in-person activities?**
COVID-19 vaccines are not expected to become available for children before the end of 2021. GSCTX will stay abreast of state regulations and the protocols that are practiced in public schools and use that information to inform their policies.
- 7. Once someone is vaccinated, do they have to continue to practice the safety protocols as outlined by the Centers for Disease Control and Prevention (CDC), such as social distancing, washing their hands frequently, and wearing a mask?**
Yes. For the protection of all members as well as the families and communities we serve, GSCTX will continue to practice, and encourage all members of the Movement to practice, all CDC-recommended health and safety protocols, regardless of whether or not an individual has received the vaccine.
